Company Introduction

Since January 18, 1968, JINYOUNG has been laying the foundation for high technology intensive industries in the machinery industry with producing and supplying machine tools, molds, and various dedicated equipment.

Leading the establishment of the Korea Mold & Die Cooperatives Association in 1980, JINYOUNG contributed to classify the mold industry as an independent industrial group under the Korean Standard Industry Classification.

JINYOUNG continues to produce spacer grid straps, which are key components of plant fuel that rely on importation

Major Products and Services

The spacer grid straps processed with materials such as zircaloy and nickel-alloy for low thermal deformation. JINYOUNG developed a special stamping progressive-die to produce a variety of 7 to 20 products through simple PC program changes.

Major Business Records, Partners and Markets

- Westinghouse spacer grid straps
OFA (14X14), OFA, NGF (16X16), V5H, RFA, NGF (17X17)
- CE spacer grid straps : 16X16 Wave type
- KNF spacer grid straps
PLUS7 (16X16), ACE7 (16X16, 17X17), HIPER17 (17X17), HIPER16 (16X16)

Qualification, Certificates, Patents and Awards

- Quality Assurance for Production of spacer grid straps by KNF.
- ISO 9001:2015/KS Q ISO 9001:2015
- ISO 14001:2015/KS I ISO 14001:2015
- 31 patents (domestic 27, overseas 4)
