## Company Introduction

GS E&C has established in 1969 under Lucky Goldstar Group as Lakhee Development, the company completed the framework for its major business structure and was reborn as GS E&C with the launch of the GS Group in 2005. Demonstrating unparalleled project execution capabilities around the globe, GS E&C continues to have strong growth in its plant, architecture, power, infrastructure, and leisure industries; representing a new paradigm in the construction industry. With its leading technologies and advanced systems, GS E&C delivers great value to customers throughout the world, including Asia, Europe and Africa.

## Major Products and Services

- Nuclear Power Plant

GS E&C has jumped into the field of Nuclear Power projects with requirement of advanced technology and perfect control quality management and have participated in the construction of Shin-wolsong Units 1,2 and Shin-hanul Units 1,2. GS E&C is successfully performing and continuously working to strengthen the competitiveness of Nuclear Power business. Based on our professional construction experiences of Shinwolsung Nuclear Power Unit 1&2 and Shinuljin Nuclear Power Unit 1&2, GS E&C will carry forward the nuclear power projects domestically and globally.

- Plant

GS E&C is putting effort into the growth of current business such as refineries, gas, petrochemical, waste and water treatment plants while expanding business portfolio by entering into FEED, Turn Around/O&M and financing of refineries.

- Power

Power business is the business of developing a country's power, communication and railway infrastructure.

- Architecture

GS E&C builds various types of buildings for residencies, offices, and factories as ordered by our clients in the public and private sectors.

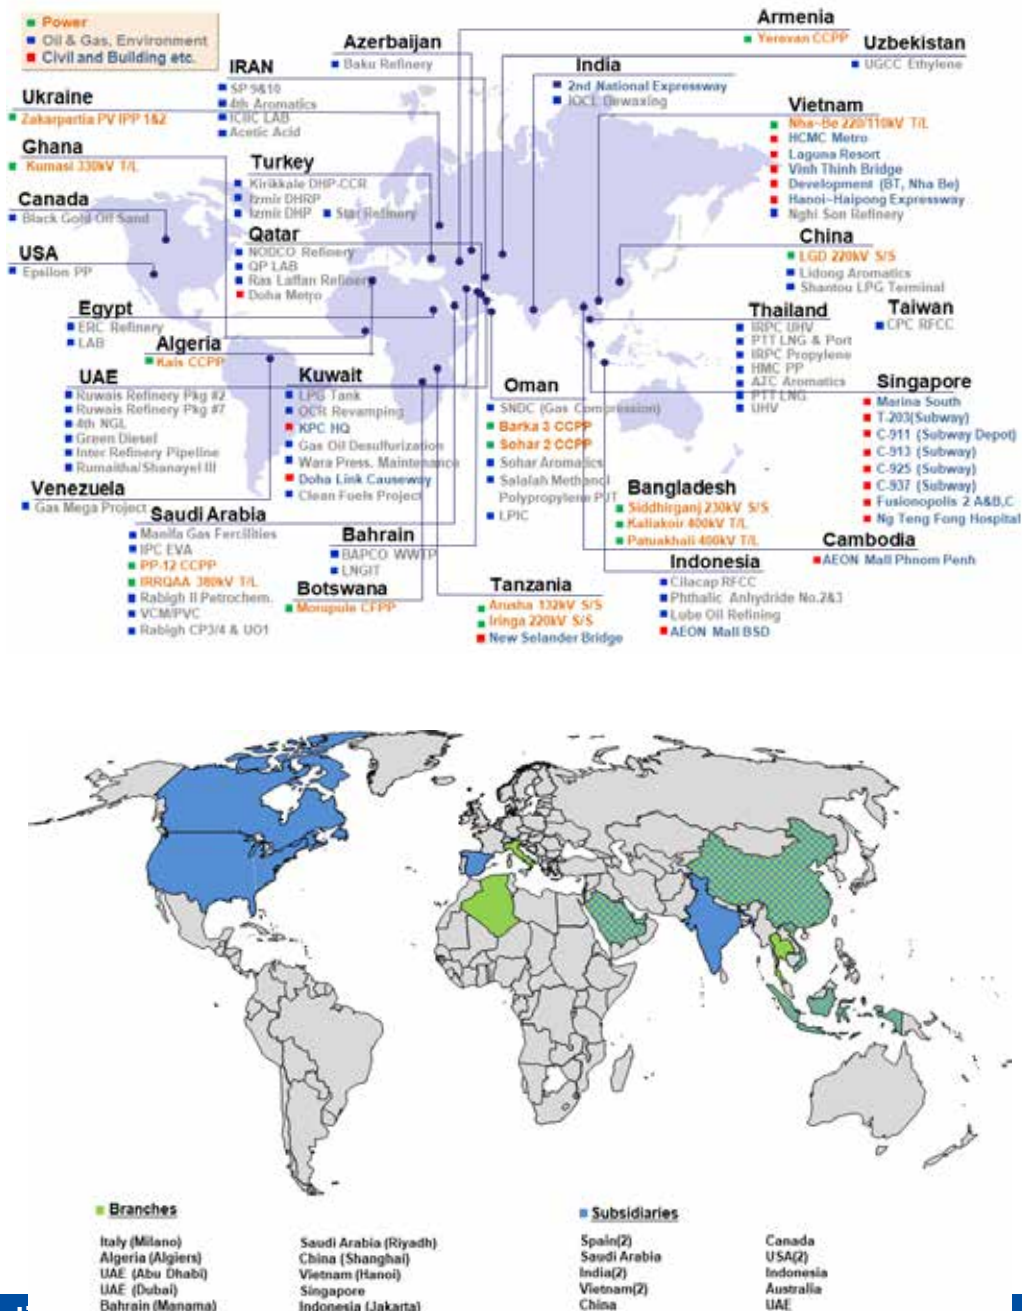

- Infra

GS E&C has completed roads, railways, water reservoirs, ports, industrial parks, and underground structures.
